Shipley		Coolham Rd nr William Penn School				See Note 2
Warnham		Bell Rd, Station Rd, A24	LPC		01/04/2008	See Note 2

NOTES: -

- 1) ADPV² - this is a priority score based on the numbers of pedestrians and vehicles and other factors reflecting the difficulty in crossing the road (in accordance with WSCC policy).
 Sites with scores of greater than 0.7 have generally been considered suitable for a controlled crossing.
 Scores of between 0.2 and 0.7 are generally recommended to be treated with a zebra crossing or pedestrian refuge due to lower levels of potential use.
 Scores of less than 0.2 have previously generally not qualified for investment using WSCC funds due to the expected low use and cost of implementation and maintenance.
- 2) ADPV² - Some sites have not been scored because of the anticipated very low pedestrian use or the site visit identified no feasible location
