**CCG Commissioning**

### Early Years (0-2) / Children & Young People

- **Normalising birth programme (North CCGs):** To support women to create an individually tailored care plan, empowering them to give birth in a care setting of their choice.

- **Perinatal Mental Health:** Complete gap analysis, best practice review and agree pathway of care.

- **Transition (North CCGs):** Agree and implement the principles of transition for all long term conditions, with a focus on diabetes, epilepsy and asthma.

### Wellbeing and Resilience

- **Community:** Wider range of services provided in Coastal area to meet demand within waiting time standards.

- **MSK:** Embedding of new service model bringing together elective orthopaedics, physiotherapy, rheumatology and chronic pain management in Coastal.

- **Wheelchair services:** CCGs have become responsible for commissioning wheelchair services and will commission to meet the principles of 'Right Chair, Right Time, Right Now'.

- **Cancer care:** North CCGs to work with the cancer team around the new NICE guidance for the two week rules for children and young people and align pathways to implement cancer guidance and ensure effective elective care management. Coastal CCG is focused on streamlining pathways to support earlier diagnosis and longer survival.

### Workforce and service resilience

- **System Resilience and Capacity Planning:** To plan effectively for surges in demand, e.g. OOH and A&E.

- **Primary Care Strategy:** Because workforce is diminishing and demand increasing, delivering a new model of care that is preventative, proactive and built on a more sustainable model of general practice. Coastal CCG strategy will review access to GPs and develop GP leaders. North CCGs to integrate health, social care and third sector support around the five communities. Fast tracking two of the towns in 2016 via the primary care home in East Grinstead and testing a self-managed team approach in Burgess Hill.

### Tier Three Obesity Service (North CCGs):** Develop and implement pathway.
