Use the sources to fill in the table.

	1839 Journey from Worthing to London	1853 Journey from London to Worthing
What type of transport was used for the journey?		
How many passengers do you think could be carried at once?		
How many times a day could the journey be made?		
What was the quickest time that the journey could be completed in?		
How much did the journey cost?		
Is this type of transport still used today?
