Motor Ambulance Scheme in Sussex.

Mr. F. H. Wayne says it is doing a most useful work.

Meeting at Haywards Heath.

As many of our readers are aware, the British Red Cross Society is developing fresh facilities in Sussex, on account of the home service ambulance scheme. Its main object is—to place a motor ambulance within a radius of not more than fifteen miles from every house in the county, ready alike to attend all cases of accident and illness requiring a very prompt visit of some 15 miles. As the Ministry of Films does not send their ambulance to the smaller hospitals in which they require treatment, the term provision has been made for the accommodation of a Motor Ambulance on the premises of the Mid-Sussex Times. The ambulance is mainly used to give aid to those who are not only suffering from acute illness, but also those who are engaged in the various industries of the county, where accidents are frequent. The ambulance is provided with the latest apparatus, and is driven by Mr. F. H. Wayne, who has given his whole time to the scheme. He has also been most useful in explaining the scheme to the various local authorities, and has been able to obtain the co-operation of all.

The ambulance is fitted with a motor and is capable of reaching any part of the county within the shortest possible time. It is also fitted with a reserve of petrol and is provided with a first-aid kit. The ambulance is driven by Mr. F. H. Wayne, who has given his whole time to the scheme. He has also been most useful in explaining the scheme to the various local authorities, and has been able to obtain the co-operation of all.
