

Wartime West Sussex 1939 - 1945

ON THE HOME FRONT - FUNDRAISING AND COLLECTING
Salvage - keep on saving

Official notice which appeared in local newspapers, May 11th 1945

**Thanks—
but don't stop!**

Real praise is due to every citizen who has done his or her bit in saving salvage — and to all the local authorities and the voluntary organisations who have helped in collection. But the need is as urgent as ever, so keep up the good work — even if collections are less frequent because of labour shortage.

What do I do . . . ?

I keep up my waste paper, rag and bone salvage, all of which go to make essential equipment for our fighting men.

I keep waste paper dry and clean and in a separate bundle.

I keep rags separate too, ready for collection, or dispose of them to a rag-and-bone man.

I clean and dry all bones, except fish bones, and keep them in a ventilated container, or put them in the bone bin, if one is provided in my neighbourhood.
